SUMMARY

Flutter Mobile Developer with experience building scalable Android & iOS apps. Skilled in BLoC state management, REST APIs, real-time sockets, and e-commerce/payment integrations, with a focus on clean, maintainable architecture.

SKILLS

Flutter, Bloc, UI/UX, Dart, Figma, Git, Problem solving, Agile methodologies

WORK EXPERIENCE

EWebSolutionsKech   **Feb 2023 - Present**
Mobile developer   *Marrakech*

- Developed a Flutter-based mobile application in close collaboration with backend engineers, integrating RESTful APIs, implementing core business logic, and shipping stable, production-grade features
- Transformed marani.ma into a user-friendly mobile application using Flutter, integrating CMI payment methods, e-commerce workflows, and secure transaction handling
- Designed and validated mobile application UX/UI flows by sketching and prototyping in Figma before development, ensuring clear requirements, smooth user experience, and efficient implementation

PROJECTS

Expensy (Personal project)

- Developed a personal expense tracking mobile application using Flutter and the MVVM architectural pattern, enabling users to add, categorize, and track daily expenses with clean and maintainable code
- Implemented Firebase integration using Firebase Authentication and Cloud Firestore for data persistence and synchronization
- Built multi-theme support (light/dark mode) using Flutter theming, applying clean architecture principles and reusable components

EasyCharge (personal project)

- Developed Recharge by Scan, a Flutter mobile application using OCR integration to scan recharge cards and automatically extract recharge codes
- Implemented SMS integration using native platform channels, enabling one-tap sending of recharge codes to mobile operators

EDUCATION

Faculty of Sciences and Technology of Marrakech   **Sep 2019 - Jun 2023**
Bachelor's Degree in Distributed Computer Systems
